

Organizational Profile

Empowering Women for a Healthier Future

Who We Are

Wajir Power Women Group is dedicated to enhancing health outcomes for women and vulnerable populations in Wajir through education and support services. We empower marginalized communities to make informed decisions and achieve improved health and well-being.

Our Story

Born from a commitment to support women in Wajir, we focus on health education and empowerment initiatives. Founded to address health disparities, Wajir Power Women has evolved over the years, expanding our reach and interventions to better serve vulnerable populations across the county.

What We Do

Our work is delivered through four core service areas:

Health Education

We provide vital health education on HIV prevention, reproductive health, and personal safety, empowering the community to make informed health decisions through continuous education on critical health topics.

Treatment Literacy

Our treatment literacy initiatives improve retention in care by educating clients about ART adherence, clinic attendance, and the importance of consistent medication utilization.

Psychosocial Support

We offer counseling services and peer support groups to help combat stigma and provide emotional assistance to those facing discrimination and mental health challenges.

Referrals and Linkages

We facilitate connections to health facilities for HIV testing, STI treatment, legal aid, and economic empowerment opportunities to enhance community welfare.

Get Involved

Join Wajir Power Women Group in our mission to empower women and enhance community health through education and support services. Partners, volunteers and community members are all welcome.
